**Tuberculosis control with the help of WHO and USA**

**360. SHRIMATI N.P. DURGA:** Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) the details of agreement entered into with USA and WHO to control Tuberculosis in the country;

(b) what is the funding pattern of USA and the WHO for research and implementing the disease-control programmes at the State-level;

(c) the number of TB patients in the country; State-wise;

(d) the details of TB cases reported in the country, particularly from Andhra Pradesh, during the last five years; and

(e) what are the results of the revised National Tuberculosis Control Programme since its implementation?

**THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRIMATI PANABAKA LAKSHMI):** (a) United States International Development Agency (USAID) has provided an assistance of Rs. 29.6 crores through WHO for implementation of the Revised National TB Control Programme (RNTCP) in the State of Haryana for the period from year 2003-2007. WHO also provides technical assistance to the Programme.

(b) for undertaking various activities for implementation of the RNTCP and also for research, the funds from USAID are released by WHO directly to the State TB Society of Haryana on the recommendation of Ministry of Health & Family Welfare. The anti-TB drugs for the State are procured by WHO and supplied as commodity grant as per the requirement worked out by Central TB Division based on Programme norms.

(c) and (d) It is estimated that every year about 18 lakh new cases are occurring in the country of which approximately 8 lakh are new smear positive and therefore infectious. A Statement indicating State-wise details of patients detected and put on treatment in the country including the State of Andhra Pradesh during last five years under the Revised National TB Control Programme (RNTCP) is enclosed ( See below).

(e) Consequent upon implementation of Revised National TB Control Programme (RNTCP) since 1997 and covering the entire country under the Programme by March, 2006 treatment success rate has tripled from 25% to 85% and death rate has been cut 7 fold from 29% to about 4% among patients registered under RNTCP. Till date, the RNTCP has placed more than 63.00 lakh patients on DOTS treatment, averting more than 11.33 lakh deaths. As per WHO latest estimates, death rate due to TB has declined from 45/lakh population per year in 1990 to 30/lakh currently.

### Statement

*State-wise details of TB cases detected and put on treatment under the programme during last 5 years and till date*

Note:—The increase in reporting of TB Cases in comparison to previous year is attributed to increase in access to RNTCP as well as good case detection rate due to improvement in the Programme management and the Programme becoming more popular.

### Survey report on maternal mortality in the country

361. SHRI K.E. ISMAIL: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether it is a fact that the maternal mortality ratio has been very high despite various measures being taken for lowering the maternal deaths particularly in the Northern and Eastern States;

(b) if so, what are the details of the findings of a survey conducted by the Registrar General of India in this regard;

(c) whether it is a fact that at this rate, the goal set by the National Rural Health Mission (NRHM) can not be met; and

(d) if so, the details and Government's reaction thereto?
